EXPERIENCE

Lab Technician

Aura Diagnostic Laboratory

📅 02/2024 - Present 📍 Surat, India

- Performed end-to-end histopathology procedures including tissue trimming, processing, paraffin embedding, microtomy, and slide preparation.
- Prepared frozen sections in compliance with immunohistochemistry and immunostaining protocols for accurate diagnostic evaluation.
- Conducted routine and advanced staining techniques, including H&E, toluidine blue, and special stains, ensuring protocol adherence.
- Executed quality control of histology and Mohs surgery slides, including handling complex specimens and reviewing control slides.
- Managed specimen accessioning, labeling, and documentation to ensure traceability and compliance with laboratory standards.
- Handled and processed human tissue samples safely, maintaining specimen integrity for histopathological analysis.
- Performed manual coverslipping and ensured high-quality slide preparation for microscopic examination.
- Maintained laboratory equipment, calibration logs, and ensured adherence to preventive maintenance schedules.
- Monitored and managed laboratory inventory, including procurement of reagents and consumables to support uninterrupted operations.
- Ensured compliance with SOPs, quality assurance protocols, and regulatory standards while maintaining accurate patient and laboratory records.
